## Girl's Council

A most important part of the life of Dreux High is centered around its dormitories. From Africa, Asia and various parts of France come students who benefit from the healthy, cheerful atmosphere, so conducive to learning. The friendly advisers give aid to the students in their studies and personal problems, thus giving the dorms a home-like warmth.

The responsibility of laying the foundation for a new school was assumed by the Student Council, as we were the coordinating government body of the students. Immediately we were faced with a host of problems, among them organizing the various classes and clubs, establishing desirable traditions, and promoting ideals for the future.

We believe we have measured up to the task which was placed before us.

The Student Council set up at Dreux was a provisional one; it continued, however, throughout the year. There was one representative from each of the four classes and from certain homerooms. Six permanent committees were formed to take care of all business. Out of these came such enterprises as the Honor Squad, comprised of outstanding students from the upper classes, and the choosing of the school historian, who keeps a permanent and interesting record of our institution.

At the beginning of the year the Council screened

suggestions for the school colors and the team name; these were then voted upon by the student body. The "Normandy Vikings" now sport red and white uniforms and follow the school flag bearing our crest.

The Seniors were given the responsibility of choosing class rings. The design picked by them has become traditional, as ruled by the Council. We provided the students with an information pamphlet on the library and arranged for several assemblies.

Perhaps our most important achievement was the adoption of the Student Council Constitution and the establishment of a permanent record file. These will help guide students in the future on such matters as government and traditions.

Through the combined efforts of the Council and the student body Dreux American High School has attained an equal standing in the community of American high schools overseas.

## Annual Staff

As a lasting reflection of the struggles, aspirations, and achievements in the establishment of an Alma Mater, the annual staff, strove to present its first edition. One main goal was kept in mind during the long hours of work, that of providing each student with many and happy memories of this first year at Dreux.

## Newspaper

An important step in the establishment of our Alma Mater was the founding of the Dreux newspaper. The NOTRE VIKING staff with the aid of Mr. Kreuger, presented their first publication on October 29, 1960. With each succeeding monthly publication the members of the newspaper staff strove to present articles of literary value and interest, encouraging and developing the students' abilities in journalism, art, and photography. Throughout our first year NOTRE VIKING has served to promote the spirit and unity so essential to a new school.
